

Remarks

It is respectfully submitted that the inconsistency noted in the Notice of Drawing Inconsistency With Specification mailed 1/24/06 is eliminated by the above amendment to the specification. Such amendment does not add new matter because the amendment is based directly on the as-filed specification at paragraph [0056], at page 19, lines 8-11, at which it is stated that:

FIGURE 5D shows a typical one of the sensors 54F as a fluoroptic probe (such as a LUXTRON brand probe) having a detector tip 126 provided with a coating 128 of a material that fluoresces differently in response to different temperatures.

It is respectfully requested that the above amendment to the specification be entered.

Respectfully submitted,  
MARTINE PENILLA & GENCARELLA, LLP
